

D-A INTERMEDIATE

POLISHING FOAM PAD

The RUPES D-A INTERMEDIATE Foam Pad joins the RUPES D-A Series foam pad range, positioning in between D-A FINE yellow pad and D-A COARSE blue pad. It is the most versatile foam pad in the BigFoot range and can be used to remove severe defects from a wide variety of painted and solid surfaces when paired with RUPES D-A COARSE blue compound. When used with RUPES D-A FINE yellow polishing compound, it removes moderate-to-fine defects and creates a high-gloss finish. The highly engineered foam formula really shines when paired with UNO PROTECT or UNO ADVANCED for final polishing and creating a durable layer of protection.

CUT/GLOSS

TIPS FOR SUCCESS

- Clean pads frequently during use with compressed air, a vacuum, or RUPES Claw Pad Tool to maintain consistent performance
- Do not over-saturate the pad with compound. Too much compound can lead to diminished performance
- After use clean with warm water and a mild soap, rinse well to remove residues, air dry
- Avoid the use of solvent-based compounds and cleaners to prevent damage to the foams cell structure
